

PGA Merchandise Show - Press Release January 2021

# The all new GSC TOURER™

## A real champion on the turf

The Australian based company GSC™ has been a major player in the golf industry for over 10 years. Following the success of the GOLF SKATE CADDY™, it is now showcasing their latest innovation – THE GSC TOURER™ A standing position personal golf transporter, here to revolutionize the way we play.

The GSC TOURER™ launches worldwide this week to the world at the PGA Merchandise Show and is an absolute showstopper!!!

# Benefits for players

Not only is it fun to ride but golfers of all ages will experience a faster paced game. The GSC TOURER™ rider can 'ride the turf' cruising to their own ball, without having to wait for their co-player as in a traditional golf cart. In these crazy times of COVID and social distancing it makes it the ideal golf transporter. The GSC TOURER™ charges quickly and efficiently making it green.

The GSC TOURER™ is engineered to carry a single player, plus a 44 pounds (20kgs), 10-inch (25cm) diameter pro-golf bag with ease over 18 holes on a grassy surface before it needs charging. Then, it simply plugs in to a normal power socket and charges like a mobile phone.

The dual folding mechanism has also been engineered to fold down to fit in most family vehicles using our stainless steel "eagle claw" combined with our heavy-duty aluminum pole. This allows the quick release mechanism to ensure no time is wasted before the game starts and none when it is time to return to the clubhouse.

## **Gentle on the turf**

Due to the relatively small ground contact area and a ground force pressure equal to a golfer on foot, it has been demonstrated that the GSC TOURER™ offers a significant reduction in course wear and tear and less maintenance compared to current popular modes of vehicular transport.

The actual impaction per square meter compared to a golf cart is potentially a massive 82% less on the surface area of the golf course and similar or less than a golfer walking with a pull cart.

## **Revolution of Rental Fleet solutions**

World's first Golf transport device with our fully IOT integrated turnkey solution, allowing QR code scanning/rental fees can be collected using a fully customized app that can be tailored for individual course's needs. Geo-fencing and speed reduction features on the backend of the app similar to the shared scooter industry. Reduce staff time required to process rentals, increase social distancing, reduce players contact to non-sanitized surfaces and other items.

This is exclusively being offered for golf courses deploying fleets of 36+ units. Please contact us directly if you are interested in deploying a fleet using this revolutionary solution for your course's rentals. Also inquire about our wireless charger docking system that we can deploy at your course for further reduction in your courses overheads.

## Good news for 'time poor' golfers

When riding a traditional 2-person cart you are restricted to where you can drive and have to follow 2 sets of balls. This leads to increased distance as you would not be travelling in a direct path to your destination.

Research has shown that the GSC TOURER™ leads to much faster games than a traditional 2-person cart. When riding a GSC TOURER™, the difference travelled is about the same as walking the course with a pull buggy. The speed of travel however is much faster. The GSC TOURER™ will allow players to play the course in 25% less time while travelling the flight path of the ball, something they cannot do with a traditional cart and allows them to really get to "know" and assess the hole and their next shot.

People love The GSC TOURER™ due to its agility and speed. When riding the GSC TOURER™ the rider is balanced, athletic and in control with precision.

## Key Features of the GSC TOURER™:

- Heat-treated aircraft aluminium frame with additional Alloy magnesium for reduced weight and added strength.
- High quality "eagle claw" heavy-duty alloy pole quick release mechanism.
- Ergonomic fully custom designed handle bars.
- Industry standard heavy-duty attachment straps to secure golf bag.
- Quick release Samsung Lithium battery (completes up to 27+ holes).
- Custom LCD screen with IOT integration available allowing for fleet management and QR payment gateway similar to the shared scooter industry (This is available for golf courses when deploying fleets of 36+ units at an additional charge).
- IP67 Weather / water resistant.
- Easy to ride (1-5 minute learning curve).
- Suitable from ages 16 +.
- Easily transported in your family sedan, hatchback, 4WD etc.
- Max Rider weight: 265pounds/120KG.
- Top Speed: 11mph/18Km/h. (Can also be set to course's requirements).
- Charge time 5-6 hours.
- Charger fully safety certified 54.6v 2a.
- Range: Up to 28 miles/45km = 27+ holes in real use situation.
- Unfolded ready to ride dimensions H:45inches/115cm W:27inches/69cm L:48inches/122cm.
- Folded ready to load/transport dimensions H:21 inches/55cm W:27 inches/69cm L:48inches/122cm.
- Net weight: 80 pounds/36.3kg.
- Gross Weight: 102 pounds/46.3kg.
- Shipping carton dimensions: L:50inches/128cm W:30 inches/78cm H:27 inches/70cm.
- Shipping Qty's 20" FCL 36pcs.
- Shipping Qty's 40" FCL 81pcs.

## Notes to editors:

The GSC TOURER™, is an innovative product from the GSC™ Brand, we are launching it worldwide here at the 2021 Orlando PGA show. We have developed a product that stands out on the turf and will benefit any player. The GSC TOURER™ is the next innovative step, after years of customer feedback insider industry knowledge along with all the learnings we have accumulated over the past decade with our previous generations of the GSC™ product range. It is a part of the FiiK™ family-owned Australian based company. FiiK™ has been an industry leading manufacturer of electric skateboards and shared/consumer scooters for over 10 years.

FiiK™ are the culmination of over a decades-worth of testing, refining, and developing cutting edge products for everyone's enjoyment. Please feel free to contact us for an interview, request high resolution images and exclusive video footage for your publications/reviews and printed media or even join us for a live factory tour!

We are here at the show looking for potential distributors/partners as well as investors that align with our vision for the future of the game.
